

MOHAMMED ADIL

Udupi, Karnataka | +91 9686002235 | adilmohammed9686@gmail.com | linkedin.com/in/mohammed-adil07

PROFESSIONAL SUMMARY

Motivated Information Science and Engineering undergraduate seeking to begin a career as a Systems Engineer at Infosys, leveraging strong foundations in Python, Java, SQL, Data Structures, and Software Engineering. With hands-on experience in full-stack application development, RESTful APIs, machine learning, and software quality assurance, I aim to contribute to building reliable technology solutions while continuously developing my technical and problem-solving skills.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript (ES6+), TypeScript
Web Technologies: Node.js, Express.js, HTML5, CSS3, REST APIs
Machine Learning & Data: Pandas, NumPy, Feature Extraction, Supervised Learning, Data Preprocessing
Databases: PostgreSQL, MySQL, SQL Queries
Core Concepts & Tools: Data Structures & Algorithms (DSA), OOP, DBMS, GitHub, Postman, VS Code

WORK EXPERIENCE

Software Intern

July 2026 – August 2026

Agnirva (Framework Internet) | Onboarded via AICTE NEAT 5.0

- Authored comprehensive **Product Requirements Documents (PRD)** and **BRDs** defining software architecture, application logic, and user workflows.
- Executed structured **Quality Assurance (QA)** testing and domain research, generating validation reports evaluating software consistency, accuracy, and completeness.
- Formulated product release strategies and integrated **accessibility guidelines (WCAG)** to improve user onboarding and system usability.
- Leveraged AI-assisted workflows to accelerate technical research, verification cycles, and engineering documentation.

TECHNICAL PROJECTS

Inventory and Order Management System

Flask, MS SQL Server, REST APIs, JS

- Architected a full-stack web application using **Flask** and **MS SQL Server** to automate real-time inventory tracking, supplier orders, and stock operations.
- Engineered a **3NF-normalized relational database** ensuring zero data redundancy, high query performance, and strict transactional data integrity.
- Developed RESTful API endpoints with an interactive JavaScript UI, eliminating manual order entry discrepancies and streamlining dispatch workflows.

House Price Prediction using Machine Learning

Python, Scikit-Learn, Pandas, NumPy

- Built an end-to-end predictive machine learning model to estimate property values based on location, area, and socio-economic market indicators.
- Performed exploratory data analysis (EDA), feature engineering, outlier detection, and scaling on historical datasets to optimize predictive accuracy.
- Implemented and evaluated multiple regression algorithms, minimizing prediction error (RMSE) to deliver accurate pricing insights for real estate decision-making.

Petri Dish Image Analysis for Urine Culture (Ongoing)

Python, OpenCV, Computer Vision

- Developing an automated computer vision diagnostic tool to analyze bacterial colony formation on Petri dish urine culture samples.
- Applying advanced image processing (adaptive thresholding, contour segmentation, morphological filtering) to accurately extract morphological colony markers.

EDUCATION

NMAM Institute of Technology, Nitte

2023 – Present

Bachelor of Technology in Information Science and Engineering | **CGPA: 7.56**

St. Mary's Pre-University College, Kundapura

2021 – 2023

Pre-University(PCMC) | **Score: 87.25%**

CERTIFICATIONS & LANGUAGES

- **AINNOVATION2025:** Microsoft Azure, AI & Applied AI Learning Challenges
- **Software Engineering Fundamentals:** Software Development Lifecycle & Testing
- **TypeScript Programming:** Modern Web Application Development | **Java Programming:** Beginner to Master
- **Languages:** English (Fluent), Hindi, Kannada, Urdu
